

## Product Data Sheet

### Tile Grout (Sanded)

## Pre-mixed Polymer Modified, Water Resistant Cement Based Sanded Grout Suitable For Wider Joints.

#### DESCRIPTION

SEA STAR TILE GROUT (SANDED) is a special type of grout that has small particles of silica sand, polymers & binders in it to make it more stronger for wider joints.

#### USAGE / ADVANTAGES

- Cement based sanded grout
- For joints 3mm & above
- Ensure proper adhesion to your tile
- Non shrink in wider gaps / joints

#### COVERAGE

Grout coverage varies with the tile size and joint width.

#### MIXING INSTRUCTIONS

- Mix SEA STAR GROUT (sanded) slowly in clean water until a smooth mixture is obtained.
- Allow the grout to rest for 5 – 10 minutes then mix it again.
- Now use the grout immediately.

#### APPLICATION INSTRUCTIONS

- Spread the grout between the tiles, pushing it diagonally across the tiles to fit into the gaps completely.
- Care should be taken while grouting as it contains silica sand which can scratch the tile surface.
- Remove surplus grout with a damp sponge with soft hands.
- When grouting is completed, clean tiles with dry cloth.

#### WATCH POINTS

Grouting should not start before the tile adhesive has dried out completely.

#### COMPOSITION, PROPERTIES, APPEARANCE

SEA STAR TILE GROUT (SANDED) is a blend of cement, silica sand, hydrophobic polymer contents, cement fillers, additives and metal oxide color pigments to make it in a variety of colors.

#### PACKAGING

Available in 2kg bag.

#### STORAGE

Store out of direct sunlight and protect from water.
