

## Product Data Sheet

### GROUT- ADMIX

# LIQUID POLYMER ADMIXTURE FOR TILE GROUT

#### DESCRIPTION

SEA STAR GROUT ADMIX is a versatile liquid polymer dispersion based on vinyl acetate and ethylene. Use it as a substitute for water to mix the cement based tile grouts to improve the grout adhesion and mechanical strength and to reduce porosity and absorption

#### APPLICATION

Suitable to use with SEA STAR tile grout in interior and exterior location both dry & wet conditions.

- Grouting facades, balconies, terraces and swimming pools.
- Grouting bathrooms, kitchens and wet areas.
- Grouting glass mosaics.
- Grouting floors with heavy traffic.

#### TYPICAL PROPERTIES

Consistency	Liquid
Color	White
Pot life	approx. 45 mins
PH-value	6.0 - 7.0
Solid content	20%
Density at 20 c	approx. 1g/cm <sup>3</sup>

#### FEATURES & BENEFITS

Addition of SEA STAR GROUT-ADMIX in tile grout greatly improves

- Strength / Adhesion
- Flexibility
- Water resistance
- Abrasion resistance
- Non-shrinkage

#### MIXING

- For 01kg tile grout add 300ml GROUT -ADMIX.
- Mix thoroughly to obtain smooth consistency.
- Use it as a total water replacement, no need to add water but can be added in small quantity if needed.

#### PACKAGING SIZE

Available in 300ml bottle.

#### SHELF LIFE

12 months if stored in dry place in an unopened packing.
